

Root phone (POCO X5 5G)

Privacy Analysis of Augmented Reality Glasses

1 Unlocking Bootloader

On the phone:

- Make sure to have Xiaomi account that is linked to the phone number of the sim card and that the number has mobile data. The steps to creating this account can be found in the section below.
- Become a developer by going to 'About phone' and tapping 'MIUI version' 7 times until the following message appears: You are now a developer.
- Go to 'Additional settings', 'Developer options',
- Enable USB debugging and OEM unlocking.
- Turn off wifi and enable cellular data from the sim card.
- Go back to 'additional settings', 'developer options' and go to 'Mi unlock status'.
- Agree to the permissions and press 'Add account and device'. It should a successful message that you were able to add the device at the bottom of the screen.

Now go onto the laptop:

- Install Mi Unlock Tools on the laptop, need windows (unofficial Mi Unlock tool).
- Extract the file you downloaded.
- Double tap MiUsbDriver from the extracted folder to extract.
- Double tap MiUsbDriver to launch application.
- You should see that the opened window says that phone is not connected.

Now back onto the phone:

- Power off the phone.
- With the Xiaomi Poco X5 powered off, press and hold 'Volume Down' + 'Power' buttons until you see the Xiaomi Poco X5 Fastboot mode screen.
- Connect the Xiaomi Poco X5 phone to your PC/ Laptop with an original USB cable.

Now onto the laptop:

- On your opened window it should now start installing drivers.
- After the installation is completed, go back to the folder for the Mi Unlock Tools.
- Double tap miflash_unlock to extract.
- Double tap miflash_unlock to launch application.
- Log in to mi unlock (better to use phone number for log in info so they don't ask for verification with phone number, hence won't need to reboot your phone then power it off and put into fastboot mode again)
- App should show: Phone connected. Then press 'Unlock'.

2 Rooting the phone

3 Create Xiaomi Account

1. On the phone go to 'Xiaomi Account' in settings.
2. Tap on create account and follow the on screen instructions. (Note that you will need a valid mail account for this).

The problem for me was that I was not able to create an account using a phone number because I kept getting the error that the number was not valid even though it was, so I used the mail to create an account and added the phone number afterwards.

I was not able to find the place where I can add a phone number on the phone nor online. So I used the link: <https://account.xiaomi.com/pass/serviceLogin?checkSafePhone=true> which I got from the thread: https://www.reddit.com/r/LineageOS/comments/1d6y974/how_do_i_add_phone_number_to_xiaomi_account/ to add my phone number. Note that when I tried to do this initially on my laptop, it kept saying that the captcha I did to prove I am not a bot is incorrect, so I changed to my phone where it worked.
