

Capturing traffic over Wi-Fi

Side Capture

Auto import media unsuccessful

Privacy Analysis of Augmented Reality Glasses

1 Introduction

This experiment captures network traffic over Wi-Fi during the interaction between an Android phone and the Ray Ban Meta glasses, more specifically looking into the auto import of media. The aim of this data collection is to observe the network traffic generated during typical media capture and to see if there are any differences from manually importing the media onto the phone.

2 Metadata

Time of experiment: Oct 16th 00:40

Duration of experiment: Roughly 20 minutes

IP addresses:

- Laptop - 192.168.0.215
- Redmi phone - 192.168.1.141
- Wi-Fi Network - 192.168.0.1
- ALFA Hotspot - 192.168.1.100/24
- Meta CDN (content delivery network) - 157.240.17.17

3 Touch Commands used

- Keep idle for 1 minute (glasses off)
- Open Meta View
- Power On
- Pairing device
- Short click capture button to take a photo
- Long click capture button to take a video recording
- Short click capture button to stop video recording
- Long press capture button to take a full length video recording
- Manual intervention
- Keep idle for 5 minutes (glasses on)
