

Capturing traffic over Wi-Fi

Voice Commands

Privacy Analysis of Augmented Reality Glasses

1 Introduction

This experiment captures the BLE (Bluetooth Low Energy) traffic whilst doing various voice commands. The capture focused on interactions between the glasses and phone, which was connected to the internet. The goal was to analyze the different voice commands done on the glasses in regards to generating BLE packets. By examining this traffic, the aim is to understand the communication patterns and hopefully provide insights into the BLE behavior of the glasses during daily usage.

2 Metadata

Time of experiment: Nov 7th 13:40

Duration of experiment: Roughly 10 minutes

Addresses:

3 Voice Commands used

- Power on glasses
- Re-pair glasses to phone
- "Hey Meta, what's the weather in [place] today?"
- "Hey Meta, what time is it?"
- "Hey Meta, what date is today?"
- "Hey Meta, what's the battery percentage?"

- "Hey Meta, play music."
- "Hey Meta, increase the volume."
- "Hey Meta, lower the volume."
- "Hey Meta, pause music."

- "Hey Meta, take a photo."
- "Hey Meta, take a video."
- "Hey Meta, stop recording."

- "Hey Meta, send a message to [name]."
- "Hey Meta, send a voice message to [name]."

- "Hey Meta, read my messages."
- "Hey Meta, set a timer for 1 minute."
- "Hey Meta, how much time is left in my timer."
- "Hey Meta, cancel my timer for 1 minute."
