

Capturing traffic over Wi-Fi Immediately Upload Privacy Analysis of Augmented Reality Glasses

1 Introduction

This experiment captures the BLE (Bluetooth Low Energy) traffic whilst doing various touch commands. The capture focused on interactions between the glasses and phone, which was connected to the internet. The goal was to analyze the different touch commands done on the glasses in regards to generating BLE packets. By examining this traffic, the aim is to understand the communication patterns and hopefully provide insights into the BLE behavior of the glasses for normal daily usage.

2 Metadata

Time of experiment: Nov 4th 17:35

Duration of experiment: Roughly 15 minutes

Addresses:

3 Touch Commands used

- Power on glasses
- Re-pair glasses to phone
- Short click capture button to take a photo
- Upload image to phone
- Long click capture button to take a video recording
- Short click capture button to stop video recording
- Upload video to phone
- Tap (and hold) on the side to play music
- Swipe forward to increase the volume
- Swipe backwards to decrease the volume
- Double tap to skip
- Triple tap to go previous
- Tap on the side to stop music
- Keep idle for 5 minutes (glasses on)
